

# CARBON PROJECT AREA - PROPOSED

BUCHANAN COUNTY

DICKENSON COUNTY

RUSSELL COUNTY

The areas shaded green and orange fall within a proposed carbon project area of about 12,257 acres, mostly in Russell County, Virginia, on HFFIV's Highlands Property.

The areas shaded green are forested.

The areas shaded orange include non-forest, non-stocked, and understocked conditions within the project boundary and total about 1,944 acres. These areas are predominantly reclaimed mine lands containing some mix of grasses, scrub, and/or planted or naturally seeded mixed hardwoods and pine.

Other non-forested features such as roadways, gas wells, and small pipelines and power lines are not delineated.
